

Meat Industry Goranovic ltd. participated in I Public invitation no. 09-908/24-13616/1 dated 27.06.2024 for the support IPARD III Programme 2021-2027 published in the Official Gazette of Montenegro no. 47/24 – Advertising Section 47/24 with the investment, i.e. project:

“Extension of the Facility for Mechanical Meat Processing within the Slaughterhouse in Kapino Polje, Purchase of the Equipment for the Needs of the Slaughterhouse in Kapino Polje and Meat Processing Plant in Straševina”.

Grant Agreement no. 09-908/24-22/04/35 was signed on 30. 05. 2025, and Annex no. 1 was signed on 29. 10. 2025, with the Ministry of Agriculture, Forestry and Water Management – Directorate for Payments.

The aim of the project: the improvement of the technological process with creation of technological opportunities for continuous improvement of product quality, i.e. monitoring of all achievements in the processing industry; elimination of current production bottlenecks; increase of capacities; higher level of automation, creation of prerequisites for the company’s long-term competitiveness.

Construction works:

The investment was related to the extension of an agro-industrial facility – industrial business building – facility no. 1 for the purposes of mechanical processing and packaging of meat. The facility was built in Kapino Polje in Niksic at cadastral parcels 780 and 764, Cadastral Municipality Nikšić (Property Certificate 758), Spatial-Urban plan Nikšić, General Urban Development Nikšić, and it was equipped with infrastructure.

Investments into the extension of the facility for mechanical processing, packaging, storage of packed meat, as well as the dispatch area within IPARD 3 Project included the delivery and installation of industrial doors and loading equipment, as well as the installation of industrial flooring suitable for the meat industry, and the delivery and assembly of drains and drainage channels. MI Goranovic ltd. completed other phases of building and equipping of the facility from its own funds.

Purchase of equipment:

The equipment for the slaughterhouse needs in Kapino Polje – equipment includes:

- Line for slicing and packaging of meat (fresh and crust-frozen) – it enables fast, precise and efficient cutting of fresh and crust-frozen meat with or without bones
- Meat dicing machine
- Automated packaging machines for fresh meat in perforated trays with top film. The machine enables fast and efficient portioning and packaging of fresh meat, in accordance with market demands.

The equipment for the meat processing plant needs in Straševina – equipment includes:

- Slicing and packaging line for final meat products – it offers precise, fast and efficient slicing and packaging of final meat products. The line meets the highest hygienic standards, high performance, exceptional quality of slicing, adjustable portions, and weight accuracy.

Grant amount for this investment was 997.976,42 € and from that amount the financial support of EU was 748.482,32 €. The investment is completed and fully implemented in compliance with the project.
